

FULL-STACK JAVASCRIPT ENGINEER

The [Coko Foundation](#) is a non-profit organization transforming how knowledge is created, improved, and shared. Our goal – to build community-owned open-source solutions in open science, open research, and open education.

We facilitate research communication organizations and institutions to take control of their infrastructure needs and empower them to work together, producing shared solutions for knowledge creation, production and sharing. Current platforms include Editoria, Kotahi, NCBI Bookshelf and microPublication.

What we're looking for

We're looking for a full-stack JavaScript engineer to join our team. Our ideal candidate would display good problem solving abilities, be self-motivated to make contributions to our running projects and be a good team player.

Responsibilities for the position will vary depending on past experience and areas of interest, but will include at least some of the following:

- Develop and maintain GraphQL APIs
- Create reusable React components, for use in multiple applications
- Develop and manage databases for our web applications
- Build beautiful UI interfaces

Requirements:

- Minimum 3 years of experience in building web applications or related libraries
- Working knowledge of at least one modern front-end framework (eg. React, Angular, Vue, etc.)
- Experience with Node.js
- Understanding of SQL relational database systems and schema design
- Familiarity with Git
- Proficient in English, as the position will require a lot of interaction with co-workers and clients in an international setting

Nice to have:

- BSc/MSc in Computer Science
- Production experience in any of the following:
 - React
 - GraphQL / Apollo
 - PostgreSQL
 - Objection.js or equivalent ORM
 - Webpack
 - Docker

- GitLab, GitHub or other repository management tool
 - Knowledge of UX principles & best practices
 - Public open-source contributions will be considered a plus
 - Experience working with a geographically distributed team
-

What we offer:

- Competitive compensation package
- Relaxed working environment
- Flexible working hours
- Open-source ([100% of our code is open-source](#))
- Working with a distributed team of developers

If you're interested, please submit your CV, as well as a cover letter (in English) telling us why you're interested and what areas of development piques your interest the most!
